Plate-*Oh!*

A new philosophy for paper plates

Enjoying dessert in an afternoon BBQ..

Yummy..Now I better dispose of my plate..

Natural adhesive used all around the edges to hold the layers together... except on one corner !

Just like on a note pad, you'd peel off the dirty layer.

Peeling off around the edges..

...and within seconds...

Your left-overs are wrapped in a biodegradable sheet

Now I can use ***the same plate*** for another course!
