Sawyer

A bike is a very good environmental means of transport. When a bike is also attractive and cool looking, the fun factor of using it is a stimulant for biking.

Sawyer is a handmade lowrider/cruiser with a custom made birch plywood frame. The bike has an extraordinary look with the use of plywood and highlights like the chainline. A uniquely designed bike with an elegant look and a comfortable ride.

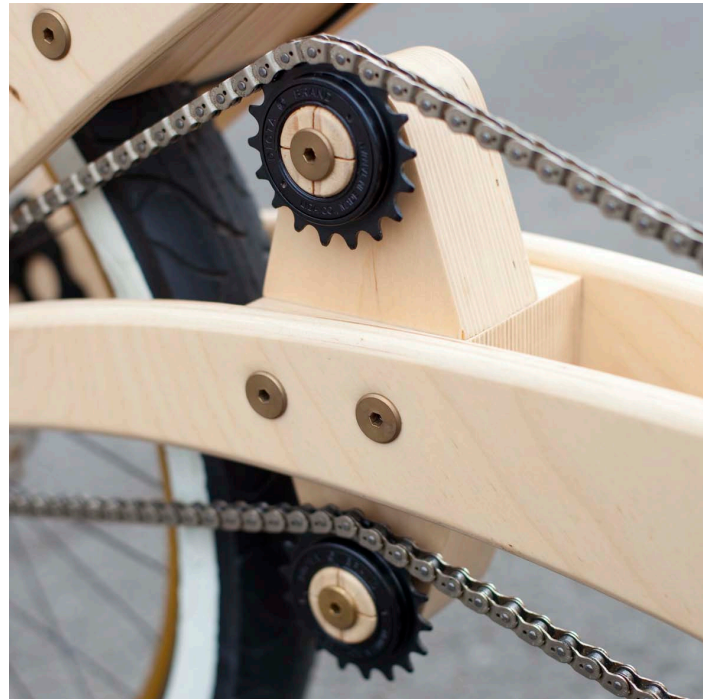

An important thing about the design of this bike is that it has an enormous visual appeal, which narrates about design, sustainability and mobility. Hand-made versus mass production, the coolness of pedal power, born out of craftsmanship and passion. A work of art.

The production of the Sawyer, in a limited edition, is going to start this year.

Sawyer has won an IBDC / IF Award in 2013 in Taipei, Taiwan.
